SUMMARY PROFILE

Results-driven QA Engineer and Software Developer specializing in test automation, performance engineering, and scalable quality solutions across banking, fintech, insurance, and retail sectors. Adept at bridging development and testing through robust CI/CD pipelines and AI-driven workflows.

SKILLS

Test Automation

Playwright
Selenium
Cypress
Cucumber
Robot Framework
Behave
SpecFlow
Gauge IO
WebdriverIO
PyTest
Tosca
HP ALM

Performance Test

LocustIO
K6
JMeter
Gremlin (chaos testing)

Testing Tools

Postman
SoapUI
Swagger
Chrome DevTools

Coding

Python
JavaScript
TypeScript
Ruby

PROFESSIONAL EXPERIENCE

Principal Consultant

Tenzing | *Dec 2025 – Present*

- Developed **SmartComm CCM** templates, document rules, and reusable components for insurance policy, claims, billing, and compliance communications.
- Integrated **SmartComm** with core insurance systems using **XML/JSON** payloads, APIs, and document generation services for on-demand and batch processing.
- Delivered high-volume omnichannel communications across **PDF, print, SMS, fax, responsive email**, and **digital channels** with dynamic content, personalization, and compliance controls.
- Supported configuration, data mapping, testing, deployment, and incident resolution to ensure scalable, accurate, and standardized customer communication workflows.

Senior Consultant

Datacom | *Oct 2022 – Dec 2025*

- Designed and maintained scalable **BDD automation frameworks** using **Ruby** and **Cucumber** for insurance platforms covering policy, claims, and underwriting workflows.
- Created test coverage for multi-channel document validation (PDF, email, SMS, fax), achieving **100% compliance** with regulatory standards.
- Integrated automated test suites into **CI/CD pipelines**, reducing manual QA workload by 60% and enabling faster, more reliable releases.
- Executed backend validation testing using **Postman** and **SoapUI**, verifying service reliability, data accuracy, and integration consistency.
- Developed reusable test utilities and modular components, improving maintainability and accelerating onboarding for new automation efforts.
- Developed **SmartComm** templates, document rules, and reusable components for insurance communications.

Development

FastAPI
ExpressJS
ReactJS
NextJS
TailwindCSS
Jinja2
HTMX
PostgreSQL
MongoDB
SQLite3
SmartComm

Dev Tools

Git
Jenkins
Docker
Unix
AWS
CI/CD
Cloudflare

AI & LLM

RAG Assistant
Prompt Engineering
GPT API Integration
OpenAI Embeddings
Semantic Search
Vector Database

Data Formats

JSON
XML
YAML
Markdown

Certifications

ISTQB CFTL
Automation Specialist
Test Design Specialist

Education

Bachelor of Science in
Computer Engineering
*Lyceum of the Philippines
University*

Software Engineer in Automation

Planit | *Mar 2020 – Sep 2022*

- Developed automated test suites for banking payment systems using **Playwright** and **Tosca**, improving regression efficiency and maintainability.
- **Led chaos testing** using **Gremlin**, uncovering system weaknesses and enhancing fault tolerance by 30%.
- Conducted **WCAG 2.1** accessibility testing to ensure compliance and usability across web platforms.
- Performed **API contract testing** using **OpenAPI specifications**, ensuring consistency and reliability of microservices.
- Built modular UI and API automation integrated into CI/CD pipelines (**Jenkins**), reducing release cycle times by 25%.

Solutions Architect

Carlson Wagonlit Travel (CWT) | *Jun 2015 – May 2019*

- Designed and implemented test automation frameworks using **Selenium** and **Robot Framework** for enterprise-scale travel management platforms, supporting both **web** and **thick-client** applications.
- Developed a customer **GUI automation library** to extend test coverage for desktop applications, enabling reusable component and reducing maintenance overhead.
- Integrated test suites into **CI/CD pipelines** via **Jenkins**, improving release stability and reducing deployment times.
- Led **cross-platform performance testing** initiatives, identifying latency issues and optimizing system responsiveness

Quality Engineer

Finastra | *Jul 2011 – Apr 2015*

- Developed **Selenium** and **Robot Framework** test suites for payment and messaging systems.
- Mentored junior testers, improving overall team automation maturity.
- Designed and maintained test automation frameworks to support continuous integration pipelines.
- Performed performance and regression testing to validate system stability under high transaction loads

Software Engineer

Accenture | *Apr 2010 – Jul 2011*

- Developed and maintained software applications, ensuring high performance, scalability, and reliability.'
- Collaborated with cross-functional teams to gather requirements, design solutions, and implement features.
- Participated in code reviews, debugging, and troubleshooting to deliver high-quality software products.

PROJECTS & PORTFOLIO

Portfolio: www.jaysonpanganiban.com

GitHub: www.github.com/jayson-panganiban

FAQ Mate - AI Powered Aussie Car Insurance Chatbot

[View Demo](#)

Technologies: Python, FastAPI, Embeddings, Gradio, Docker

- Built a **Retrieval-Augmented Generation (RAG)** system to answer real-world insurance Australian car insurance FAQs using **semantic search** with **OpenAI embeddings**.
- Integrated a lightweight **Gradio** interface for real-time user interaction and hosted the solution using **Docker** for streamlined deployment.

Half Price Grocery – Full-Stack Grocery Deals App

[View Site](#)

Technologies: ReactJS, ExpressJS, Cloudflare, D1, Playwright, JavaScript

- Developed a **full-stack web application** that aggregates and displays half-price specials from major Australian supermarkets.
- Implemented **backend scraping logic**, **RESTful API**, and **Playwright** test coverage for continuous data freshness and reliability.

Philippine Zip Code Portal

[Visit Site](#)

Technologies: Python, TypeScript, NextJS, Playwright

- Created a searchable zip code directory for Philippine regions with server-side APIs using **FastAPI** and a responsive frontend built in **NextJS**.
- Added automated tests using **Playwright** and deployed the site as and SEO-optimized, static web app.

Rest in Pytest – API Testing DSL

[View Repo](#)

Technologies: Python, Pytest, HTTPX

- Developed a custom **DSL (Domain-Specific Language)** on top of **Pytest** for expressive **API testing**.

Rephrase CLI – Text Rewriting Tool

[View Repo](#)

Technologies: Python, OpenAI API

- Built a command-line tool that leverages the **OpenAI** API for rewording and rephrasing input text based on various tones and levels of formality.
